Sparse sampling can obscure known bistability
A
Double well: dense observations
state, z
time
B
Double-well reconstruction
dense: 2 inferred minima
$\hat{V}(z)$
state, z
C
OU-control reconstruction
dense: 1 inferred minimum
$\hat{V}(z)$
state, z
D
Double well: sparse observations
state, z
time
E
Double-well reconstruction
sparse: 1 inferred minimum
$\hat{V}(z)$
state, z
F
OU-control reconstruction
sparse: 1 inferred minimum
$\hat{V}(z)$
state, z
